For more details you may contact 8787513884/ 7085060925 / 9884954937 / 9564479467

CAREER TIPS

Plastic technology, as it is widely known, is a branch of technology that constitutes processing, design, development, and manufacture of plastic products. Also referred to as plastic engineering, plastic technology educates one on how to apply the basic principles of engineering in order to produce plastic products by assisting and guiding engineers and other professionals.

Qualification Required

To pursue a career in plastic engineering, you can go for a diploma in plastic engineering after 10th grade or a BE/B.Tech course after 10+2. You have to be good with Physics & Chemistry primarily; mathematical skills might prove as an added advantage. Various institutes offer M.Tech programs to BE/B.Tech degree holders from branches like chemical engineering, plastic-rubber technology, mechanical engineering as well as textile engineering.

Top Indian Institutes

<i>Institute</i>	<i>Course</i>
Central Institute of Plastic Engineering & Technology (CIPET)	Diploma
	B.E./B.Tech
	M.Sc.
	M.Sc. Tech

	M.E./M.Tech
	Ph.D.
Indian Institute of Technology, Delhi (IIT-Delhi)	1. M.Tech 2. Ph.D.
Madras Institute of Technology	1. B.Tech 2. Ph.D.
LD College of Engineering	B.E.
University College of Science & Technology, Calcutta University	1. B.Tech 2. M.Tech 3. Ph.D.
Birla Institute of Technology, Mesra	1. B.Tech 2. M.Tech 3. Ph.D.
Indian Plastics Institute	1. Certificate course 2. Diploma

Fee Structure

Almost all the top institutes in India offering plastic engineering are government-affiliated. The fees may vary from INR 10,000 to 80,000 depending on the institute/university. For overseas universities, the cost that a student would incur for the degree would vary from INR 15 lacs to 35 lacs.

Salary Structure

Starting salaries for plastic engineering graduates might vary in the private sector from INR 12,000 to 25,000 per month & in the public sector from INR 10,000 to 20,000 per month. For people with M.E./M.Tech degrees, starting salaries can go as high as INR 30,000 to 40,000 per month.

You may find a number of job opportunities for a career in plastic engineering. As per the current estimation by CIPET, the Indian Plastic Industry directly or indirectly employs 3.3 million people. The appraisal & growth rate in the industry has the potential of generating 3 million additional employment opportunities in the next few years. With the new concept of biodegradable polymers, there is a huge demand for new R&D in this field opening up even more horizons for the use of

plastics. Just in the first decade of the 21st century, the demand for plastic raw material has more than doubled from 3.3 million metric tons to 6.8 million metric tons. Furthermore, the recycling industry in India has umpteen employment & growth opportunities as well. As a plastic engineer, you may find jobs and be a vital resource to various critical sectors of the economy like agriculture, infrastructure, consumer goods, telecommunication, medical, automobile, construction, packaging, healthcare, etc.

Some of the profiles that plastic engineers work on may include roles as:

- Production Engineer
- Safety Supervisor
- Lecturer
- Mold & Process Engineer
- Manufacturing Engineer
- Product Designer
- Quality Control in-charge
- R&D Officer
- Extrusion Specialist

Future Prospects

A plastic technologist can find job openings in public sector organizations, such as Oil India Limited, Oil and Natural Gas Corporation, Petroleum Conservation Research Association of India, and Ministry of Petroleum and Natural Gas.

Further, employment is also offered by petrochemical engineering plants, polymer companies, and private companies dealing in the production and marketing of plastic commodities. What's more, big industrial houses in India that have set up research laboratories for developing new products and plants for producing new materials also require plastic technologists.
