CAREER TIPS

Linguistics is the study of human language, its sound, structure, meaning and function. It studies language as a universal and recognizable part of human behavior. It attempts to describe and analyze language.

What does a Linguist do?

- Found in MANY different settings as:
 1. Interpreters
 2. Translators
 3. Transcriptionists
 4. Government Reporters
 5. Professors
 6. Government Analysts
 7. Cryptologists
 8. Etc.

Representative job titles and areas of specialization:

- ❖ A degree in linguistics can be of great value in the pursuit of **careers** in education, publishing, media, social services, communication, computer languages, voice analysis research, communicative

disorders and other language related fields. In recent years, there has been a surge of demand due to developments in artificial intelligence, communication sciences, and computer applications in natural language processing and understanding, information sciences and other high-technology activities. There are also developing fields in bilingualism, literacy, linguistic problems of ethnic minorities, and other topics in applied linguistics.

- ❖ Teaching is one of the best options, which is provided by linguistics studies. There are openings in schools, colleges and other institutions that carry out foreign language training/teaching programmes.

- ❖ Several government agencies hire linguists to supervise language-training programme. Others have linguists to carry out research on various languages, or to work in specialized fields such as, the determination of geographical names for mapping and other purposes.
- ❖ Lexicographers are involved in the publishing of dictionaries (electronic as well). They are concerned with such matters as pronunciation, the definition of grammatical terms, various languages' dialectical variation, and etymology. Other areas of publishing in which linguists are involved include foreign language textbooks, editing, consulting and planning elementary and secondary programmes in reading, writing and spelling (curriculum designing).
- ❖ The role of linguists in speech pathology and audiology is varied. Through research efforts they have improved ways of analyzing and evaluating the language disintegration associated with various

disorders such as aphasia, dyslexia etc. Linguistic researches have also provided valuable information about the stages normal children go through after the first word appears, enabling the evaluation of child language disorders and the design of intervention programmes based on the normal sequence of development. This is a major area, which will demand the contribution of more and more linguists in coming days.

- ❖ Linguists play a major role in solving certain criminal cases. Even Investigation agencies have to take the help of a linguist in cases, which involve speaker identification. As acoustic phonetics is one of the significant courses of linguistics study, a linguist proves to be a technically trained manpower for such investigations.
 - ❖ Today, there is a boom in Call center jobs. Linguistics caters their needs directly. These centers not only utilize the services of linguists to prepare training modules but to get their trainees trained professionally. This industry poses an everlasting demand for linguists.
 - ❖ Technical writing involves putting scientific and technical information into readily understandable language in the preparation of manuals, instructional materials and engineering reports. These technical writers are none other than linguists who are usually part of the team, working closely with scientists, engineers, accountants, and others.
- 
- ❖ Translation studies are part and parcel of linguistics programme. A linguist is trained in translation techniques, which makes him/her eligible for translator's posts both in public and private sectors.

- ❖ Other than these areas, there is a new upcoming field for linguists where his/her contribution will be playing a major role. This field is our banking and financial service sector, which offers managerial posts to linguists making him/her responsible for providing effective phonetics, language, input, culture and customer service training to delegates and monitor consistency of training.
- ❖ In addition to above mentioned job oriented fields, if one wants to excel in research, linguistics offers comprehensive options not only in India but in other parts of the world as well. If you are willing to travel extensively, knowing various culture and civilizations around the globe, linguistics is one of the best options. Almost all major and minor funding agencies (both national and international), provide fellowship/scholarship assistance for conducting linguistic researches depending upon their area of interest.

Places of Employment:

- Consulting firms
- Elementary and secondary schools
- Government services:
 - ✓ Investigation Agencies.
 - ✓ Department of Defence, etc.
- International Organizations
- Language Institutions
- Media houses

- Publishing companies
- Research Institutions
- Speech/language rehabilitation centers
- Sign language cell
- Universities and colleges

Is Linguistics the Right Career Path for You?

Students who choose to study linguistics obtain valuable skills that give them a competitive edge in the job market, whether they apply for jobs directly associated with the course or not. Linguistics trains students to think critically and apply analytical reasoning, which can be useful in various job positions in many industries.

If you have an innate fascination with language, and honing and capitalizing your interest sounds attractive to you, then linguistics is likely to prove to be a viable career path.
