CAREER TIPS

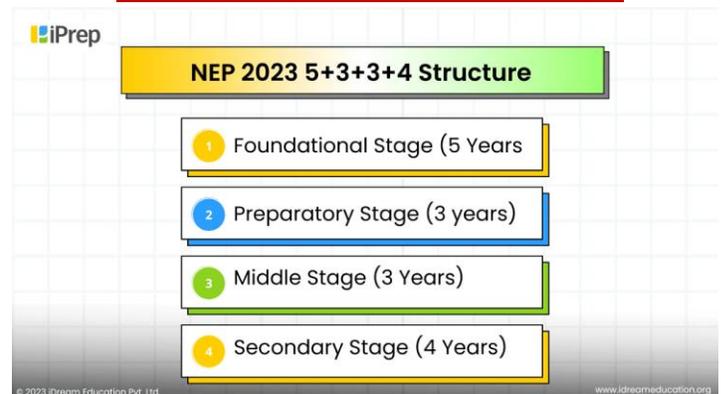

Under the Visionary Leadership of Prime Minister Shri Narendra Modi Ji and the Ministry of Human Resource Development, the New Education Policy of 2023 (NEP 2023) was released on 29 July 2020 after approval by the Union Cabinet.

The main purpose behind redefining NEP policy is:

“To universalize education and make India a global knowledge superpower”

A significant change in NEP 2023 from the past involves the transition from the conventional 10+2 model to the ever-growing 5+3+3+4 structure. This framework places a strong emphasis on fundamental skills and life competencies at every educational level.

What does 5+3+3+4 Structure mean?

To create a holistic pedagogical environment, National Education Policy 2023 emphasizes on:

Foundational Stage (5 Years)

During the first three years of pre-primary education, children will primarily engage in playful and interactive learning activities, while the following two years in classes 1st and 2nd the focus will be on the development of Foundational Literacy and Numeracy (FLN) skills.

Preparatory Stage (3 years)

During this three-year phase, the primary emphasis is on students of classes 3rd, 4th, and 5th grades where a multifaceted teaching approach will be integrated as it seamlessly integrates various subjects, providing a well-rounded and holistic learning experience. The

focus of preparatory stage centers on fostering a sense of discovery and exploration, aiming to steer away from rote learning of complex concepts. It is important because at this stage when the curriculum gets deep it becomes necessary to encourage a deeper understanding and the practical application of knowledge.

Middle Stage (3 Years)

During this three-year phase, the emphasis is on delving deeper into the subject matter for students in 6th, 7th, and 8th grades. The Middle Stage will focus on helping students explore subjects in greater detail, thereby enabling critical thinking. Furthermore, the Middle Stage is dedicated to introducing project-based learning to help students gain hands-on experience.

Secondary Stage (4 Years)

In the final four years of school, from grades 9 to 12, students get ready for their future. Some for higher education or vocational paths. Therefore, during this stage, when students can choose what they want to study, the focus will be on holistic development. This will help them gain real-world skills and competencies.

New National Education Policy 2023 – How is it different from National Education Policy 1986

Holistic approach with a broader focus

In the New National Education Policy 2023, a strong emphasis has been laid on multiple dimensions that positively influence the overall growth of the student, mind development, and career clarity. This is seen in initiatives such as technology usage, experiential mode, and exit and entry options. Whereas, in the older National Education Policy 1986, the focus was on clearing exams, and gaining merits and degrees, since improving national literacy was the major challenge in those days.

Stress on language

The latest NEP 2023 displays unconditional veneration for Indian languages and identifies the cruciality of teaching in the mother tongue. The older policy did not touch down on this. Historic negligence of Indian languages seems to be aptly fixed in National Education Policy 2023, a much-needed attention that was grossly missing in the older education policies.

New Education Structure

With the latest 5 + 3 + 3 + 4 system, the National Education Policy 2023 calls for a paradigm shift that is set to turn into an epochal development. In the older policy, there was little attention or attempt to address the education structure reforms.

Multidisciplinary approach

Choosing a stream of choice with a career and passion in mind is always a challenge for the child. The choking that every child had to go through due to the terms of the older policy has been fixed in the New National Education Policy 2023. NEP 2023 clearly paves the way for a multidisciplinary approach that enables students to opt for subjects across streams, thus encouraging cross-disciplinary learning.

Education from early stages

The National Education Policy 2023 clearly attaches importance to education from early childhood. The older policy did not focus on this aspect.

Technology

As the latest NEP 2023 is unveiled and put into action, the world is already witnessing rapid progress and development on the technological front. The advent and intervention of technology have completely changed the way we live. The education sector is not immune to

this. The NEP 2023 attempts to raise the bar in this direction and makes ample provisions to encourage and proliferate technological interventions in the education system. In the old policy of 1986, this was obviously missing.

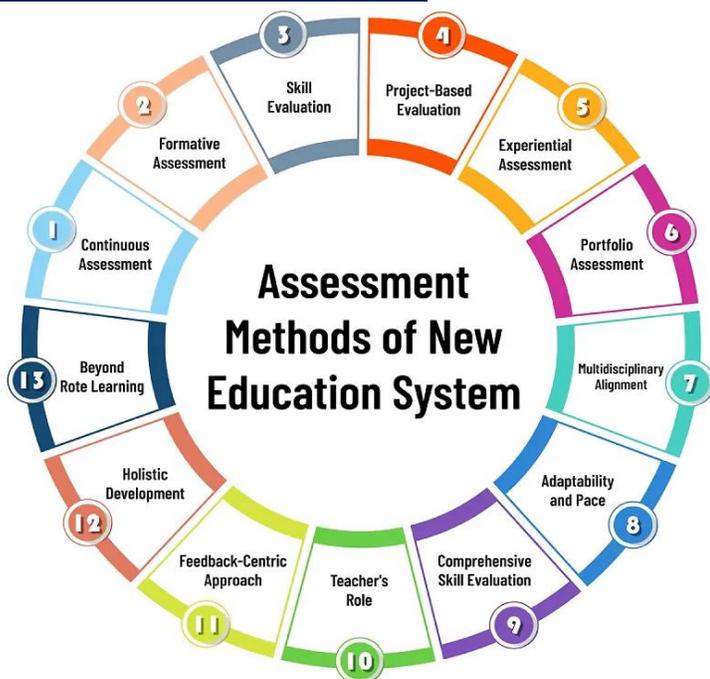

Vocational education

The National Education Policy 2023 invites the incorporation of vocational education in mainstream education with appropriate synchronization that only complements conventional education rather than competing or cannibalizing it. With stress on fostering skill development and boosting entrepreneurship, the NEP 2023 constituents are on the job in the right way. The older policy only resulted in building degree factories where institutions were more into propagating the importance of mainstream subjects with an examination perspective. In the NEP 2023, there is a clear importance given to honing the skills and competencies of the children from a young age, thereby preparing them for their careers.

Experiential Learning

The National Education Policy 2023 is for experiential learning, encouraging learning while observing experiencing, and handling real-world applications. The older policy was hinging on rote learning and memorization.

Changes in Assessment Methods

Important Highlights of New Education Policy 2023

- | | |
|---|---|
| 1 Schooling starts at the age of 3 years now | 2 Mother tongue as medium of instruction |
| 3 NO UGC, AICTE, NCTE | 4 Science, Arts, and Commerce gets blurred |
| 5 FYUP Programme Returns & No More Dropouts | 6 Common access at all school-level education |
| 7 Attaining Foundational Literacy and Numeracy (FLN) starting from grade 3 by 2025 | 8 Experiential learning in the school curriculum |
| 9 Increase the graduate enrollment ratio | 10 Enhancing the Standards of Open and Distance Learning |
| 11 Technological innovation in education | 12 Internationalisation of education |
| 13 Increase in public investment in education | |
